Probably our single most popular tour. It features the essence of Iceland, including natural wonders, such as the Geysir hot spring and Gullfoss the majestic waterfall. During this tour geology and history are especially emphasized. At Þingvellir National Park, which is on the UNESCO World Heritage list, you can see where the oldest, still active parliament in the world was founded in 930. The park is also of great geological interest as one can clearly see where the tectonic plates are drifting apart and the land in between is sinking.
